Building and Construction Solutions

New Ideas. Valued Partner. Optimized Solutions.

Building and Construction Solutions

We supply an extensive offering of tapes, sealants, packaging tools, and equipment to support your building and construction supply needs.

Cloth Duct Tapes

The solution for many securing, seaming, repairing, bundling, splicing, packaging, masking, patching, sealing, waterproofing, and reinforcing applications.

Blue Painter's Tape

Use this painter's tape to mask off areas, achieve crisp paint lines and for clean removal within 14 days of application.

Masking Tapes

Masking tapes come in a variety of adhesive strengths and are used for holding, bundling, and painting.

House Wrap Tape

Seal seams on house wrap applications such as sheathing, insulation, and vapor barrier materials.

Polyethylene Tapes and Stucco Tape

These specialty tapes are used to mask indoor and outdoor surfaces, such as windows and doors during stucco applications, painting, and hanging poly sheeting.

Double Coated Containment Tape

This tape features premium grade painter's tape adhesive on one side for 21-day clean removal from a variety of surfaces, and on the other side, an aggressive adhesive that securely holds poly sheeting and other protective coverings.

Polyethylene Sheeting

Polyethylene sheeting creates a vapor barrier, which protects surfaces from paint, water, dust, and other debris.

Pallet Bags and Top Sheets

Keep building materials free from dirt and debris.

Stretch Film

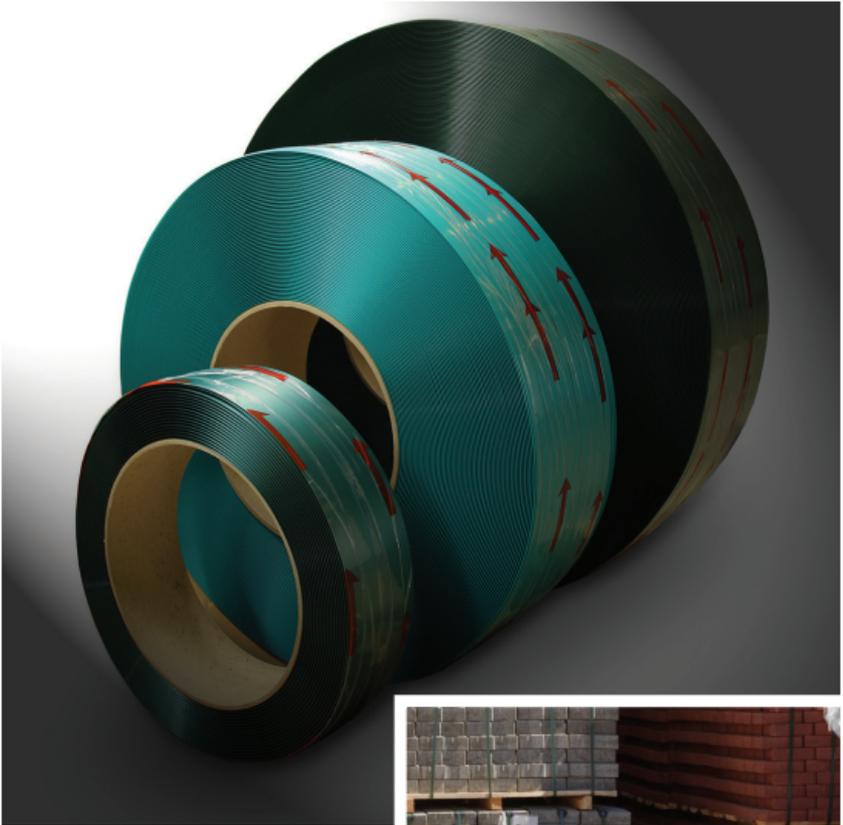

Many different thicknesses and types available to protect even the most demanding loads from shifting and debris.

Anti-corrosion and VCI additives are available for many poly/plastic products upon request.

Banding and Strapping Materials

Depending on your application, polypropylene, polyester, steel, and cord strapping materials are strong solutions for keeping products and materials together.

Strapping Tools

We have strapping tools that are portable and battery-operated as well as standard manual tools and accessories.

Protective Films for Carpet, Countertops, Duct, and Windows

Keep important areas clean during construction and staging with durable, protective films.

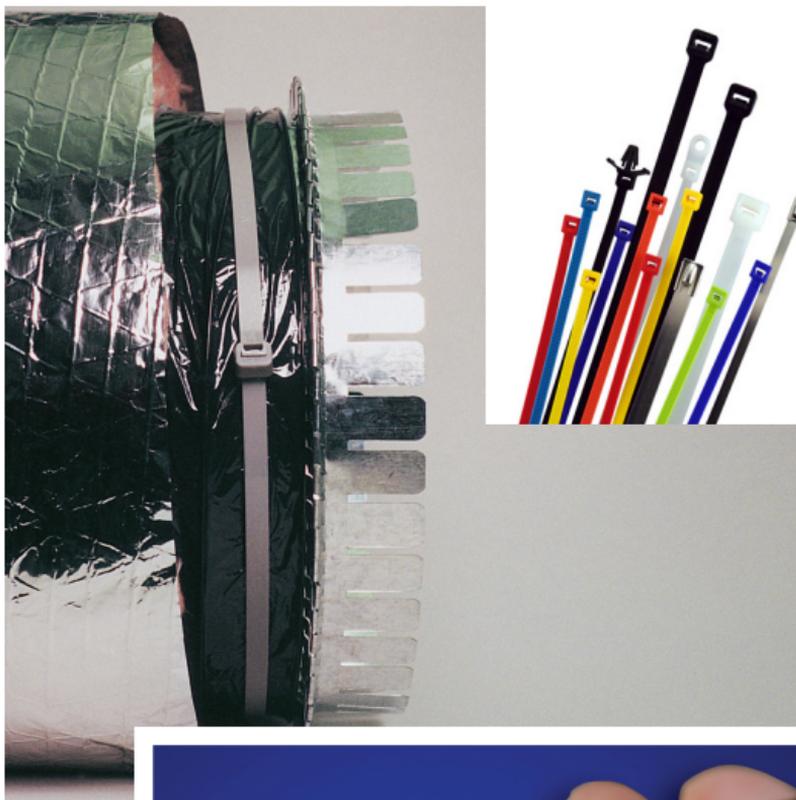

Form-Fitting Y-Seal Bags

Protect important materials on the jobsite with Y-seal bags tailored for large loads. No stapling of excess plastic is required and custom printing is available.

Duct Straps and Cable Ties

These easy-to-install and lock straps and cable ties can be used to secure duct work and many other things; use cable ties to color code, bundle, and organize your products.

Electrical Tapes

Use electrical tapes for wire and cable insulation, bundling, and splicing insulation. These tapes come in various colors. Flame retardant and cold resistant tapes are available.

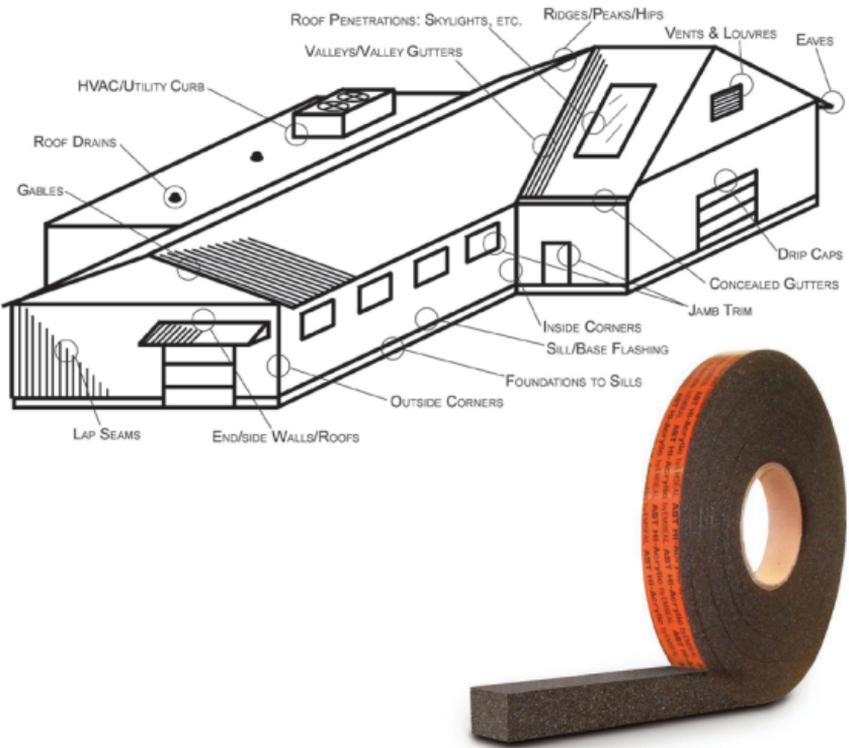

Foil Tape/Insulation Seaming Tape

Foil and insulation seaming tape is the ideal solution to seam and repair building insulation facings, seal duct systems, cracks and seams in gutters, roofing and eaves, and to protect duct work and piping. Insulation tape can be used as a sealant for building expansion joints or a watertight seal to keep out moisture, vapor, air, or sound.

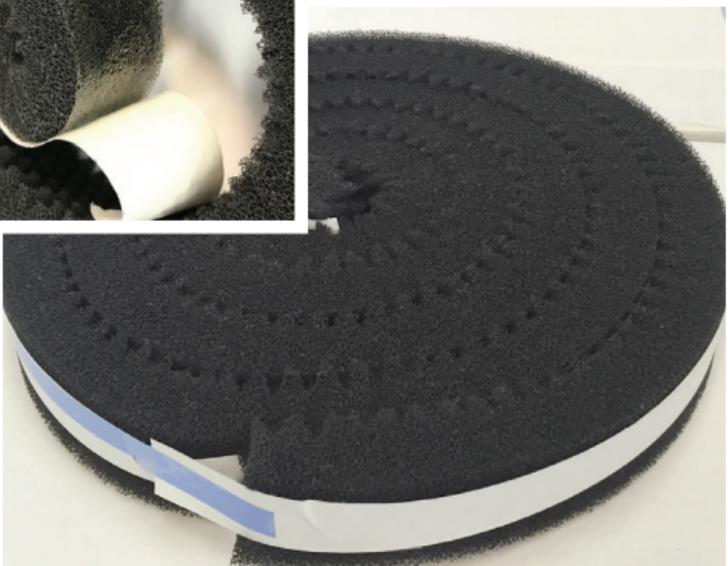

Expandable Foam Tape Sealant

Self-expanding closure tapes for use on metal roofing, buildings, and void fill and gasketing applications. We offer many types of foam tapes in different densities with adhesives that range from removable to permanent.

Ridgevent Polyurethane Foam

This polyurethane foam conforms to metal roof panels, allows for ventilation, and closes the gap between ridge or hip cap and metal roofing panels.

Reflective Insulation Products

We offer a full line of reflective insulation and related products to replace or compliment fiberglass insulation. Applications include, concrete underlayment, metal and post frame building, radiant and vapor barriers, and duct insulation.

Barricade Tapes

Alert workers and visitors on the job site with non-pressure-sensitive barricade and warning tapes.

CAUTION CONSTRUCTION AREA

CAUTION WET PAINT
